

E-Tuner App Update (No Google Play)

To install the E-Tuner app onto your Android Device without the Google Play Store:

- **Enable installations from 3rd party sources on your Android Device first:**
 - o Go to Android Settings -> Security. Scroll to Unknown Sources, and press OK to enable). This will allow you to install the E-Tuner app downloaded from the Edelbrock website.

Enabling Non-Google Play Store App Installations:

To Download & Install the App:

- 1) Connect to the internet, and go to: www.edelbrock.com
- 2) Go to the EFI section, then either E-Street 2 or Pro-Flo 3
- 3) Select the Support/Downloads tab (App is the same for both systems)
- 4) Download the latest APK file.
- 5) Use your file manager app to open the APK file.
- 6) Select Package Installer, then Always when the popup menus appear.
- 7) If you have not enabled installations from "Unknown Sources," follow the instructions for enabling Non-Google Play Store installations.
- 8) Install the app. This can take a couple of minutes to complete.
- 9) After the app is finished installing, press Open. This will start the app.
- 10) You may now use E-Tuner. Please load any new map and firmware on the ECU if there were any updates with the new E-Tuner release.
