

## Updating the E-Street Tablet App:

**E-Tuner Versions applicable for the update:** v0.9:675 or earlier.

- 1) Download the New E-Tuner App from the Edelbrock Website.
  - **Go to:** Edelbrock *EFI Support* webpage:  
<http://www.edelbrock.com/automotive/mc/efi/support.shtml>
  - Under the E-street EFI Software section, download the file:  
**“E-Street EFI Software”**
- 2) Connect your Tablet to a computer USB port and open the storage folder when prompted.
  - Your tablet may be listed under “Portable Devices” in “My Computer.”
- 3) Transfer/Copy the downloaded E-Street EFI Software file (**EdelbrockE tuner\_v1.apk**) from your computer to the **“Download”** folder on your tablet.

**Note:** You may also use the *Internet Browser* on your tablet to download the app file directly.

### Install new E-Tuner App:

- 4) Power-On the tablet and navigate to the Android “Home” screen.
- 5) Uninstall the Old App from the tablet:  
Android Settings → Apps → Select: **“EdelbrockTabletBT”** → Select: **“Uninstall”**  
Select: **“OK”** to confirm.
- 6) Make sure the “Unknown Sources” in Android Settings is “enabled.”  
Android Settings → Security → **Unknown Sources** (check mark = enabled)
- 7) Navigate to the Tablet’s **“Download”** Folder:  
Android Home Screen → File Manager → **Download** (“sdcard” directory)
- 8) Select and open the E-tuner app file (**EdelbrockE tuner\_v1.apk**).
  - If prompted to choose an installation method, select the “Android Package Installer” and “Just Once.”
- 9) From the “EdelbrockTabletBT” install menu, select: **“Install.”**
- 10) When the process completes, select: **“Open”** to start the app.

Your E-Street tablet is now updated to E-Tuner software version: v1.00:676. If your ECU was already paired to the tablet, it will still be saved and recognized by the app.
